

Broadgate

BUSINESS CONNECTIVITY

The right connection. From the right carrier.

We work with many carriers and suppliers, so we can build each connection around your business at the best price, rather than selling you one network.

How long can you afford to be offline?

Every internet connection drops from time to time. The answer decides the right setup for you.

A few hours is fine

Standard business broadband.

An hour at most

Broadband with automatic backup from a second carrier.

Never

Lines from different carriers working together, with disaster recovery in place.

Best price

We compare carriers for you, so you don't have to.

Built around you

Every solution is designed for your sites and how you work.

Stay online

A backup line from a different carrier takes over if your main line fails.

More speed

Two lines can work together to give you more capacity.

Disaster recovery

A plan in place, so your business can keep trading.

One partner

One bill, one support team and a named account manager.

From a café to 100 sites

A café or estate agent

A serviced office with tenants

A national organisation with 100 sites

Free connectivity review

We'll look at your sites and current connections, and recommend the right setup.

Connections for every business

Whatever your sites need, we'll find the right connection from the right carrier.

Business broadband

Reliable broadband for everyday use, with no phone line needed.

SOGEA / SOTAP

Full fibre

Fibre all the way to your building, for faster, more consistent speeds.

FTTP

Leased lines

A dedicated line just for your business, with guaranteed speeds both ways.

LEASED LINE

4G and 5G

Mobile broadband, as a backup or a fast temporary connection.

CELLULAR

Satellite

Starlink, for remote sites where nothing else reaches.

STARLINK

Mix and match, through one managed router

Combine any of these connections and our managed router uses them together, switching automatically if one fails.

Full fibre + 5G backup

for an office

Leased line + Starlink

for a remote site

Two broadband lines, two carriers

for a shop

We work with national carriers including BT Wholesale, Gamma, TalkTalk, Virgin Media, Vodafone, Colt and CityFibre. We also work with local and regional networks, which often offer better prices in their areas than the national providers.

1. We check your sites

What's available at each address, and from which carriers.

2. We design the solution

The right mix of connections for how long you can afford to be offline.

3. We install and manage it

Including the managed router, all supported by us.

Talk to one of our experts

Tell us about your sites and how long you can afford to be offline, and we'll design the right connection.
